CALOMEL DYNAMITES A SLUGGISH LIVER

Crashes into sour bile, making
you sick and you lose
a day's work.

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a 50 cent bottle of Dodson's Liver Tonic, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tonic you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; they like it.

The scarlet fever situation thruout this county seems to be much improved in the past few weeks. For several weeks there were many cases in several parts of the county, not an epidemic in any part, but numerous scattering cases in a number of places. The physicians have successfully quarantined and otherwise controlled the situation so that there have been no deaths except those in the ninth district during Christmas week. The other cases seem to have been light and the disease easily controlled. A number of cases of diphtheria have also been found by the physicians in several sections of the county, but so far as heard, there have been no deaths from it.

Our Spring Stock is Already Beginning to Arrive.

The business for 1916 bids fair to be most prosperous all over our land. The South will, undoubtedly, get her full share. The Southern States in 1915 produced an abundance of fruits, grains, vegetables, in fact, most everything that is grown down here. And even the cotton crop, at the price it brought, gave to the South thousands of dollars more than did the far larger crop of 1914.
